PROJECTS

Money Penny | (*React/Redux, Rails 5, PostgreSQL, Sass, Chart.js*)

[live](#) | [github](#)

- Implemented full CRUD functionality across five features, utilizing modals to ensure DRY, scalable code.
- Enhanced user experience through the use of aggregate public API data and by developing interactive data visualizations using chart.js.
- Optimized code readability and performance by designing the application around a purely functional react structure and through integrating React hooks to replace Redux boilerplate.

AcrossWords | (*React/Redux, Node.js, Express, MongoDB, Styled-Components*)

[live](#) | [github](#)

- Developed RESTful API routes to deliver fast, dynamic reloads on the front end.
- Utilized indexing and algorithmic best practices to design and deploy a MongoDB database with highly efficient search capabilities.
- Achieved a dynamic gaming experience through extensive use of asynchronous Javascript and CSS grid.
- Managed React state with custom hooks and a hybrid React-Redux implementation.
- Led a group of 5 engineers from design to deployment, following an agile git workflow.

Poetree | (*JavaScript, Axios, CSS, HTML*)

[live](#) | [github](#)

- Accomplished full drag-and-drop functionality in modern ES6+ JavaScript.
- Utilized semantic HTML and modern CSS flexbox technologies to create responsive web pages.
